P1 Search With Pacman, Part 1

Go to:
http://inst.eecs.berkeley.edu/~cs188/pacman/search.html

Download the required files and follow the explanations. You will be modifying the files **search.py and searchAgents.py**.

Do the **questions 1-4** and answer the corresponding questions in the .pdf file (iv part, look at the general instructions). You'll be implementing DFS, BFS, UC and A*.

Use the class slides as reference for the implementation. You may also want to have a look at the reference book (AI a modern approach) to have access to pseudocode and explanations as well.
